Professional Summary

Full Stack Software Engineer with over 2 years building scalable web applications, microservices architecture, and RESTful APIs. Expert in software development lifecycle, CI/CD pipelines, database optimization, and Agile environments.

Technical Skills

Programming Languages: Go (Golang), JavaScript, TypeScript, SQL, HTML5, CSS3, Shell Scripting
Backend Development: Go Fiber, Chi Router, Node.js, Express.js, RESTful APIs, GraphQL, Microservices Architecture, API Development, WebSockets
Frontend Development: React.js, Next.js, Redux, Tailwind CSS, Responsive Design, Single Page Applications
Database & Data Management: PostgreSQL, MongoDB, Redis, Database Design, Query Optimization, Indexing, Data Structures
Cloud & Infrastructure: Amazon Web Services (AWS) (EC2, S3, SES, Lambda), Microsoft Azure, Docker, Containerization
DevOps & Tools: CI/CD Pipelines, GitHub Actions, Git Version Control, Linux/Unix, Agile Methodologies, Scrum, Test-Driven Development, Code Review, Software Testing, Problem Solving, Debugging

Professional Experience

OHA Research Pvt. Ltd. | *Software Engineer* June 2024 – Present

- Architected microservices using Go and Node.js, improving scalability by 40% and reducing API response time by 25%
- Implemented real-time WebSocket services, reducing server load by 30%
- Designed ML recommendation system with collaborative filtering, increasing engagement by 35%
- Established CI/CD pipelines using GitHub Actions, Docker, and AWS, reducing deployment time by 50%
- Optimized PostgreSQL through indexing and query optimization, improving response time by 45%

Pizone Infotech Solutions Pvt. Ltd. | *Software Engineer Trainee* Dec 2022 – Jul 2023

- Developed enterprise applications using .NET, C#, and Angular, serving 10,000+ users with 99.5% uptime
- Delivered custom solutions in Agile/Scrum environment, achieving 95% client satisfaction
- Built responsive SPAs with Angular and TypeScript, improving mobile UX by 40%
- Performed code reviews and debugging, reducing system downtime by 30%

Technical Projects

EdTech Learning Platform | *Node.js, AWS, Docker, PostgreSQL, RESTful APIs* 2024 – 2025

- Architected scalable backend for 5,000+ students with microservices, assessments, and content management
- Developed secure RESTful APIs with JWT authentication and RBAC for data security
- Deployed Docker containers on AWS EC2 with S3 storage and SES notifications, achieving 99.9% uptime
- Integrated payment gateway APIs and automated workflows, increasing conversion by 25%

NFT Marketplace Sniping Bot | *Next.js, Web3, Blockchain, APIs, Real-time Processing* Feb 2024

- Built Web3 application for automated NFT trading on SEI Blockchain with real-time monitoring and alerts
- Implemented concurrent processing with async JavaScript, handling 100+ NFT listings per minute
- Integrated blockchain APIs and smart contracts for automated trading with 99.9% uptime
- Developed responsive frontend using Next.js and React hooks for real-time data visualization

Education

Bachelor of Technology in Computer Science Expected June 2025
Surendera Group Of Institutions *Current GPA: 8.4/10.0*

Coursework

Relevant: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Software Engineering, Operating Systems, Computer Networks, Web Development

Certifications

AWS Cloud Practitioner (In Progress) — **Go Programming Specialization** - Coursera

Full Stack Web Development - FreeCodeCamp
